

AUTOMATION AND COMMUNICATION INTEGRATED IN JUST ONE SOLUTION

Home Automation &
Video Door Entry System

All-in-one
Solution

Z41 COM

Z41 COM is a capacitive touch panel with additional communication functions including video intercom with SIP and KNX technologies.

What can a Z41 COM do?

- Change set point temperatures.
- Regulate lighting in any room in the home.
- Switch on air conditioning locally or from other city.
- Configure blinds to be closed at any time you decide.
- Receive notices on your Smartphone if you have a gas leak, outbreak of fire or flood in a bathroom.
- Open your garage door.
- Establish different set points for each room to save energy.
- And a long so on.

Anything else?

- Yes!, it allows you to receive the entry calls from the video intercom, and open the portal to allow controlled access.
- You can change the volume during the call.
- Press the mute function to have a private conversation while you evaluate who has called.
- And other value-added features available in the video intercom function.
